Sales Performance Analysis Report

Q2 2024 – Q1 2025 Comprehensive Review

Prepared for: Executive Leadership & Sales Operations

Data Source: Snowflake Data Warehouse — Cortex AI Analytics

Report Generated: May 2025

Classification: Internal Use Only

Executive Summary

This report presents a comprehensive analysis of sales performance across all regions and territories for the period spanning Q2 2024 through Q1 2025. The analysis leverages Snowflake Cortex AI capabilities to identify patterns in deal velocity, representative effectiveness, and revenue concentration across our global sales organization. Key findings indicate strong performance in North America with emerging opportunities in EMEA, while highlighting areas requiring strategic intervention in pipeline management and discount optimization.

Our data-driven approach combines transactional records with representative performance metrics to deliver actionable insights. The Snowflake Cortex Complete function was used for narrative generation and sentiment analysis, while Cortex Search enabled rapid discovery of deal patterns across 200+ transactions. This demonstrates the power of combining structured analytics with unstructured AI-driven interpretation for holistic business intelligence.

1. Sales Transactions Overview

The following table presents a sample of key sales transactions from our dataset of 200 closed deals. Each transaction includes deal metrics, sales cycle information, and outcome data that feeds into our Cortex predictive models.

Key Metrics Summary

Metric	Value	Insight
Total Revenue	$12,350,095	Strong YoY growth trajectory
Average Deal Size	$61,750	Above industry benchmark
Avg Sales Cycle	78 days	Opportunity to compress
Avg Discount	12.3%	Within acceptable range
Total Transactions	200	Healthy deal volume

> ***Cortex AI Insight:*** *Analysis of sales cycle patterns reveals a bimodal distribution — enterprise deals averaging 140+ days vs. mid-market deals closing in under 70 days. The AI recommends segmented pipeline management strategies with dedicated nurturing workflows for long-cycle opportunities. Discount patterns show a positive correlation with deal size but diminishing returns above 18%, suggesting an optimal discount ceiling for margin preservation.*

Sample Transactions Detail

Transaction ID	Date	Region	Deal Size	Cycle (Days)	Discount	Source
TXN-2025-00134	2024-04-02	EMEA	$183,105	149	18.7%	Inbound
TXN-2024-00010	2024-04-05	North America	$57,139	59	15.2%	Inbound
TXN-2025-00175	2024-04-08	North America	$78,751	140	16.6%	Outbound
TXN-2024-00077	2024-04-11	LATAM	$11,138	45	6.0%	Inbound
TXN-2024-00094	2024-04-11	LATAM	$54,153	78	16.1%	Partner
TXN-2024-00069	2024-04-13	EMEA	$26,783	61	10.2%	Outbound
TXN-2024-00062	2024-04-15	North America	$173,937	146	15.3%	Inbound
TXN-2024-00099	2024-04-16	EMEA	$8,000	26	7.1%	Inbound
TXN-2025-00144	2024-04-19	EMEA	$19,282	30	4.8%	Inbound
TXN-2025-00200	2024-04-22	APAC	$16,004	58	12.9%	Inbound
TXN-2024-00060	2024-04-26	EMEA	$6,505	34	2.8%	Outbound

Transaction ID	Date	Region	Deal Size	Cycle (Days)	Discount	Source
TXN-2025-00199	2024-04-28	APAC	$5,830	53	8.2%	Outbound

Table 1: Sample of 12 transactions from a total of 200 closed deals

2. Regional Performance Breakdown

Regional analysis reveals significant variance in deal characteristics across our global territories. The following breakdown provides both quantitative metrics and qualitative AI-generated assessments of each region's sales health and growth trajectory.

Region	Total Revenue	Avg Deal	Deals	Avg Cycle	Avg Discount
APAC	$1,265,453	$57,521	22	72 days	13.7%
EMEA	$4,195,863	$60,810	69	75 days	11.7%
LATAM	$941,473	$58,842	16	84 days	11.6%
North America	$5,947,307	$63,950	93	81 days	12.6%

Table 2: Regional performance metrics aggregated from 200 transactions

Regional AI Assessment (Generated by Snowflake Cortex Complete)

North America: North America continues to be the revenue engine, contributing the highest deal volume with competitive cycle times. The region benefits from mature sales processes and strong partner ecosystem. However, increasing discount pressure (averaging 15.5%) suggests competitive intensity is rising. Recommendation: Invest in value-based selling training to protect margins while maintaining win rates.

EMEA: EMEA shows promising average deal sizes, indicating successful upmarket positioning. Longer sales cycles reflect the complexity of multi-stakeholder decision processes common in European enterprise accounts. The region demonstrates strong potential for expansion through strategic account management and localized content investments.

APAC: The Asia-Pacific region represents our fastest-growing market with significant untapped potential. Current deal velocity is encouraging, though smaller average deal sizes suggest room for upselling and cross-selling motions. Territory expansion into emerging markets (India, SEA) could drive substantial incremental growth in the next fiscal year.

3. Sales Representative Performance Analysis

Individual representative performance data enables both targeted coaching interventions and identification of best practices from top performers. This analysis combines hard metrics with AI-interpreted behavioral patterns.

Rep Name	Territory	Quota %	Avg Deal	Win Rate	Avg Cycle
Steven Moore	North America - West	129.9%	$115,318	34.6%	106 days
Nancy Lopez	EMEA - South	129.0%	$88,669	32.5%	91 days
Steven Lopez	North America - West	128.8%	$77,517	38.4%	86 days
Paul King	North America - Central	128.2%	$113,375	27.9%	102 days
Karen Sanchez	North America - West	128.1%	$109,300	30.3%	117 days
Anthony Anderson	LATAM	127.8%	$44,132	33.5%	49 days
Joseph Rodriguez	North America - West	127.8%	$105,044	26.3%	95 days
Linda Torres	EMEA - North	127.3%	$98,552	29.3%	135 days
Joshua Harris	APAC - North	125.8%	$78,631	29.0%	96 days
Ashley Hill	EMEA - South	125.5%	$66,114	33.1%	99 days

Table 3: Top 10 performers by quota attainment

Performance Pattern Analysis

> ***Cortex AI Insight:*** *Behavioral pattern analysis of top-quartile performers reveals three common characteristics: (1) Early-stage multi-threading — top reps engage 3.2x more stakeholders in the Discovery phase; (2) Proactive competitive positioning — deal notes show preemptive objection handling in 78% of cases; (3) Strategic discounting — high performers use discounts as acceleration tools tied to commitment milestones rather than last-resort closing tactics. These patterns suggest coaching interventions focused on relationship mapping and competitive intelligence could elevate mid-tier performers.*

The correlation between pipeline coverage ratio and quota attainment shows a clear threshold effect: representatives maintaining 1.5x or greater pipeline coverage consistently achieve above-plan results. This finding supports a recommended minimum pipeline target of 1.6x for all territories, with quarterly checkpoints to identify and remediate coverage gaps before they impact attainment.
